VOL. III.—EIGHTH SERIES

JANUARY—DECEMBER 1958

LONDON:

TAYLOR & FRANCIS, LTD., RED LION COURT, FLEET STREET, E.C.4.

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. III. Nos. (25–36)
(EIGHTH SERIES)

NUMBER 25—JANUARY

PAGE

Observations on Helical Dislocations in Crystals of Silver Chloride. By D. A. Jones and J. W. Mitchell, H. H. Wills Physical Laboratory, University of Bristol 1

The Centre of a Dislocation: II—The Dilated Slit. By Elizabeth H. Yoffe, Cavendish Laboratory, Cambridge 8

Further Interactions of the Heavy Nuclei of the Cosmic Radiation. By. V. Y. Rajopadhye and C. J. Waddington, H. H. Wills Physical Laboratory, Bristol 19

Absorption of Negative K-Mesons and the Neutron and Proton Distributions in Heavy Nuclei. By P. B. Jones, Cavendish Laboratory, Cambridge 33

The Heat Capacity of Diamond between 12·8° and 277°K. By J. E. Desnoyers and J. A. Morrison, Division of Pure Chemistry, National Research Laboratories, Ottawa, Canada 42

The Use of a Model in Anharmonic Lattice Dynamics. By D. J. Hooton, Department of Applied Mathematics, University of Liverpool 49

Time Variations of the Cosmic Ray Intensity in Jamaica. By J. C. Barton and J. H. Stockhausen, University College of the West Indies, Jamaica 55

Etching Patterns in High-Purity Zinc. By I. S. Servi, Metals Research Laboratories, Electro Metallurgical Company, Niagara Falls, New York 63

Deformation Processes in Polyethylene Interpreted in terms of Crystal Plasticity. By F. C. Frank, A. Keller and A. O'Connor, H. H. Wills Physics Laboratory, University of Bristol 64

Charged Dislocations and the Strength of Ionic Crystals. By J. D. Eshelby, C. W. A. Newey and P. L. Pratt, Department of Physical Metallurgy, University of Birmingham, and A. B. Lidiard, Department of Physics, University of Reading 75

The Decay of Long-Lived Holmium 166. By M. A. Grace, R. T. Taylor and P. B. Treacy, The Clarendon Laboratory, Oxford 90

The Observation of Vacancy Sources in Metals. By R. S. Barnes, G. B. Redding and A. H. Cottrell, Atomic Energy Research Establishment, Harwell 97

A Note on Stress Pulses in Visco-Elastic Rods. By D. S. Berry, Research Association of British Rubber Manufacturers, Shawbury, Shrewsbury 100

Correspondence:

Propagation of Dislocations in Electron Irradiated Lithium Fluoride. By A. D. Whapham, Metallurgy Division, A.E.R.E., Harwell, Berks. 103

The Half-Life of Thallium 196 and the Multipolarity of the 426 kev Transition in Mercury 196. By G. Andersson, J. O. Burgman and B. Jung, The Gustaf Werner Institute for Nuclear Chemistry, Uppsala, Sweden 105

Reviews of Books 107

NUMBER 26—FEBRUARY

PAGE

The Interaction Rates of Stopped Negative Muons in Iron and Copper. By A. M. Hillas, W. B. Gilboy and R. M. Tennent, Physics Department, University of Leeds 109

A Variational Calculation of the Equilibrium Properties of a Classical Plasma. By S. F. Edwards, Department of Mathematical Physics, University of Birmingham 119

On the Origin of Dislocations. By Doris Kuhlmann-Wilsdorf, School of Metallurgical Engineering, University of Pennsylvania 125

The Calculation of the Drag on Problems Solved by the Hodograph Method. By A. G. Mackie, St. Salvator's College, St. Andrews..... 140

The Protons Emitted from Iron-54 and Iron-56 on Bombardment with 13·5 mev Neutrons. By P. V. March and W. T. Morton, Department of Natural Philosophy, University of Glasgow..... 143

Boundary Layer Growth on a Spinning Body: Accelerated Motion. By Y. D. Wadhwa, Department of Applied Mathematics, Indian Institute of Technology, Khargpur, India 152

The Ultimate Distribution of Impurity in the Zone-Melting Process. By L. W. Davies, Division of Radiophysics, C.S.I.R.O., Sydney, Australia..... 159

The Positron Decay of the Ground State of Aluminium-26. By P. S. Fisher and D. W. Hadley, Department of Physics, University of Birmingham and G. Speers, The Radiochemical Centre, Amersham 163

The Remanent Magnetism of Some Lavas in the Deccan Traps. By E. R. Deutsch, Department of Physics, Imperial College of Science and Technology and C. Radakrishnamurty and P. W. Sahasrabudhe, Tata Institute of Fundamental Research, Bombay 170

The Electronic Structure of the Metals of the First Transition Period. By W. M. Lomer and W. Marshall, Atomic Energy Research Establishment, Harwell, Berks. 185

Correspondence:

Parity Conservation in Strong Interactions: The $^{7}Be(n, \alpha)^{4}He$ Reaction. By R. E. Segel, Aeronautical Research Laboratory, WADC, J. V. Kane, Brookhaven National Laboratory, Upton, N.Y., U.S.A. and D. H. Wilkinson, Brookhaven National Laboratory, Upton, N.Y., U.S.A., and Clarendon Laboratory, Oxford 204

On the Fermi Surface of Copper. By F. Garcia Moliner, Cavendish Laboratory, Cambridge 207

Electromagnetic Stirring in Zone Refining. By I. Braun, F. C. Frank, S. Marshall and G. Meyrick, University of Bristol, H. H. Wills Physics Laboratory 208

Reviews of Books 210

Errata..... 212

NUMBER 27—MARCH

The Theory of Small Angle Scattering from Dislocations. By H. H. Atkinson and P. B. Hirsch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England..... 213

Calculations of Solid-State Data of Neon, and the Vapour Pressure Ratio of its Isotopes. By T. F. Johns, Atomic Energy Research Establishment, Harwell, Berks..... 229

PAGE

Analysis of Nuclear Interactions of Energies between 1000 and 100 000 BEV. By B. EDWARDS, J. LOSTY, D. H. PERKINS, K. PINKAU and J. REYNOLDS, H. H. Wills Physical Laboratory, University of Bristol.... 237

The Process of Magnetization by Chemical Change. By G. HAIGH, Department of Physics, Imperial College, S.W.7..... 267

Unloading Effects in the Plastic Properties of Copper Single Crystals. By M. J. MAKIN, Metallurgy Division, A.E.R.E., Harwell..... 287

Correlations in the Charge Density of a Classical Plasma By S. F. EDWARDS, Department of Mathematical Physics, University of Birmingham..... 302

Correspondence

Dislocations in Caesium Bromide. By S. AMELINCKX, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium..... 307

The Temperature Dependence of Flow Stress in Copper Single Crystals. By M. J. MAKIN, Metallurgy Division, A.E.R.E., Harwell..... 309

Reviews of Books..... 312

NUMBER 28—APRIL

The Magnetic Susceptibility and Electrical Resistivity of Some Transition Metal Silicides. By D. A. ROBINS, Research Laboratories of The General Electric Company Limited, Wembley, England..... 313

$\pi^{\pm} \rightarrow \pi^0 + e^{\pm} + \nu + 8m_e c^2$? By E. FEENBERG and H. PRIMAKOFF, Washington University, St. Louis, Missouri, U.S.A. 328

The Decoration of Dislocations in Crystals of Silver Chloride with Gold. By J. T. BARTLETT and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol..... 334

The Thermal and Electrical Resistivity of Bismuth and Antimony at Low Temperatures. By G. K. WHITE and S. B. WOODS, Division of Pure Physics, National Research Council, Ottawa, Canada 342

The Polarization of Luminescence in Diamond. By R. J. ELLIOTT, I. G. MATTHEWS and E. W. J. MITCHELL, Physics Research Laboratory, The University of Reading..... 360

On a Feature of Galactic Radio Emission. By HARRIET TUNMER, Cavendish Laboratory, Cambridge..... 370

Observations on Extensive Air Showers. V. The Size Spectrum of Showers containing 3×10^6–3×10^8 Particles. By T. E. CRANSHAW, J. DE BEER, W. GALBRAITH and N. A. PORTER, Atomic Energy Research Establishment, Harwell 377

Plastic Deformation of Nickel Single Crystals at Low Temperatures. By PETER HAASEN, Institute for the Study of Metals, University of Chicago, U.S.A., and Max-Planck-Institut für Metallforschung, Stuttgart, Germany..... 384

Correspondence :

Etching Patterns in High Purity Zinc. By F. C. FRANK, University of Bristol, H. H. Wills Physics Laboratory, Bristol, 8 and THAD VREELAND, Jr., Division of Engineering, California Institute of Technology, Pasadena, California, U.S.A..... 419

Evidence for the Trapping of Interstitial Atoms in Irradiated Tungsten. By M. W. THOMPSON, Metallurgy Division, A.E.R.E., Harwell 421

Reviews of Books..... 424

NUMBER 29—MAY

PAGE

On Whisker Growth Shapes. By S. Amelinckx, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium 425

The Electronic Structure of Diamond, Silicon and Germanium. By G. G. Hall, Department of Mathematics, Imperial College, South Kensington, London, S.W.7 429

The Twist in a Crystal Whisker Containing a Dislocation. By J. D. Eshelby, Department of Metallurgy, University of Birmingham 440

The Structure of Strong Collision-Free Hydromagnetic Waves. By J. H. Adlam and J. E. Allen, A.E.R.E., Harwell, Didcot, Berks 448

Nuclear Orientation of Praseodymium 142. By M. A. Grace, C. E. Johnson, R. G. Scurlock and R. T. Taylor, Clarendon Laboratory, Oxford 456

Some Thermal Properties of Helium and their Relation to the Temperature Scale. By R. Berman and C. F. Mate, Clarendon Laboratory, Oxford 461

Density Changes of Crystals containing Dislocations. By A. Seeger and P. Haasen, Max-Planck-Institut für Metallforschung, Stuttgart, Germany 470

Small Angle Scattering from Cold-Worked and Fatigued Metals. By H. H. Atkinson, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 476

Nuclear Alignment and the Beta Transition in Cobalt-58. By P. Dagley, M. A. Grace, J. S. Hill and C. V. Sowter, The Clarendon Laboratory, Oxford 489

Taylor's Theorem for Shift Operators. By R. A. Sack, Department of Theoretical Physics, University of Liverpool, and British Rayon Research Association, Manchester 497

Restricted Random Walks and the Use of Moments. By R. A. Sack, Department of Theoretical Physics, University of Liverpool, and British Rayon Research Association, Manchester 504

The Growth of Inorganic Salt Whiskers from Solution. By P. Charsley and P. E. Rush, Research Laboratory, Associated Electrical Industries Limited, Aldermaston Court, Aldermaston, Berkshire 508

Annealing in Slip Bands in Copper Fatigued at 90°K. By D. Hull, Atomic Energy Research Establishment, Harwell 513

The Influence of Vacancies upon the Internal Friction of Polycrystalline Copper. By R. S. Barnes, N. H. Hancock and E. C. H. Silk, Atomic Energy Research Establishment, Harwell 519

The Effects of Neutron Irradiation upon the Internal Friction of Copper Single Crystals at Liquid Nitrogen Temperatures. By R. S. Barnes and N. H. Hancock, Atomic Energy Research Establishment, Harwell, Berkshire 527

Direct Observation of the Strain Field Produced by Coherent Precipitated Particles in an Age-Hardened Alloy. By R. B. Nicholson and J. Nutting, Department of Metallurgy, Cambridge University 531

Correspondence :

The Remanent Magnetization of Single Domain Ferromagnetic Particles : II. Mixed Uniaxial and Cubic Anisotropies. By D. G. Tonge and E. P. Wohlfarth, Department of Mathematics, Imperial College, London 536

Grüneisen's Law and the Third Law of Thermodynamics. By Martin J. Klein and Solomon J. Glass, Department of Physics, Case Institute of Technology, Cleveland, Ohio 538

PAGE

The Evolution of the Extra-galactic Nebulae and the Origin of Meta-galactic Radio Noise. By C. E. R. Bruce, Electrical Research Association Laboratory, Leatherhead, Surrey 539

The Small Angle Scattering of High Energy Photons in Uranium. By J. Moffatt and M. W. Stringfellow, Clarendon Laboratory, Oxford 540

Reviews of Books 543

NUMBER 30—JUNE

Nuclear Magnetic Resonance in Indium Antimonide. I. The Effect of Impurities. By E. H. Rhoderick, Services Electronics Research Laboratory, Baldock, Herts 545

Nuclear Magnetic Resonance in Impure Indium Antimonide. By M. H. Cohen, Cavendish Laboratory, University of Cambridge 564

The Giant Photonuclear Resonance in the Rare Earth Region. By D. H. Wilkinson, Clarendon Laboratory, Oxford 567

The Energy and Angular Distributions of the Protons from the Reaction ^{60}Ni(n, p)^{60}Co Induced by 13·5 mev Neutrons. By P. V. March and W. T. Morton, Department of Natural Philosophy, University of Glasgow 577

Do the 'Constants of Nature' change with Time? By D. H. Wilkinson, Clarendon Laboratory, Oxford 582

Viscosity of Liquid Helium II near the Lambda Point. By J. G. Dash, Royal Society Mond Laboratory, Cambridge 586

Superconductivity of Thorium below 1°K. By Norman M. Wolcott and Robert A. Hein, United States Naval Research Laboratory, Washington, D.C. 591

The Cleavage of Metal Single Crystals. By A. N. Stroh, Department of Physics, University of Sheffield 597

Intensity Calculation of Some Optical Absorption Lines in Hydrated Manganous Salts. By S. Koide and M. H. L. Pryce, H. H. Wills Physics Laboratory, University of Bristol 607

Dislocations and Cracks in Anisotropic Elasticity. By A. N. Stroh, Department of Physics, University of Sheffield 625

The Capture of Slow Neutrons by Protons. By A. R. Baker and D. H. Wilkinson, Cavendish Laboratory, Cambridge 647

Correspondence:

A Simple Formula for use with Carbon Thermometers at Low Temperatures. By O. V. Lounasmaa, Clarendon Laboratory, Oxford 652

The Nucleation of Dislocation Loops during Cleavage. By S. Amelinckx, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium 653

Precipitate Instability During Unidirectional Extension of an Age Hardened Aluminium–Zinc–Magnesium Alloy. By I. J. Polmear and I. F. Bainbridge, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia 655

Measurements of Thermoelectricity below 1°K. By D. K. C. MacDonald, W. B. Pearson and I. M. Templeton, Division of Pure Physics, National Research Council, Ottawa, Canada 657

Reviews of Books 661

NUMBER 31—JULY

PAGE

Thermal Expansion of Lead at Low Temperatures. By P. N. Dheer and S. L. Surange, National Physical Laboratory, New Delhi 665

On the Occurrence of Slip in Diamond. By S. Tolansky, A. Halperin and S. H. Emara, Royal Holloway College, Englefield Green, Surrey 675

Suppression Effect of the Ionization Produced by Electron–Positron Pairs of Extremely High Energy. By Junji Iwadare, H. H. Wills Physics Laboratory, University of Bristol 680

Formation of Fatigue Cracks. By W. A. Wood, Baillieu Laboratory, University of Melbourne 692

The Initial Magnetization of Alpha-Iron at High Temperatures. By L. Alberts and B. J. Shepstone, Physics Department, University of the Orange Free State 700

A New Function in the Theory of Fluids and an Equation of State for Liquids and Gases. By A. G. McLellan, University of Canterbury, Christchurch, New Zealand 707

Nuclear Particle Track Photography in Electric Fields. By I. E. Bock, Clarendon Laboratory, Oxford 715

Crack Formation in Magnesium Oxide Single Crystals. By R. J. Stokes, T. L. Johnston and C. H. Li, Minneapolis-Honeywell Research Center, Hopkins, Minnesota, U.S.A. 718

Polarization Measurements of Gamma Radiation from Sulphur-34. By G. G. Shute and P. S. Fisher, Department of Physics, University of Birmingham 726

The Effect of Stacking Fault Energy on Low Temperature Creep in Pure Metals. By P. R. Thornton and P. B. Hirsch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 738

Optical Constants, Heat Capacity and the Fermi Surface. By M. H. Cohen, Institute for the Study of Metals, University of Chicago and Cavendish Laboratory, University of Cambridge 762

Correspondence:

A Method of Detecting an Observer Bias. By R. M. Tennent, Physics Department, University of Leeds 776

The Specific Heats of Gadolinium and Terbium between 0·2°K and 6°K. By N. Kurti and R. S. Safrata, Clarendon Laboratory Oxford 780

Reviews of Books 784

NUMBER 32—AUGUST

Thermal Conductivity of the Solidified Inert Gases: Argon, Neon and Krypton. By G. K. White and S. B. Woods, Division of Pure Physics, National Research Council, Ottawa, Canada 785

Cold Neutron Scattering in Bismuth. By R. C. Bhandari, Tata Institute of Fundamental Research, Apollo Pier Road, Bombay 1, and P. G. Khubchandani, Atomic Energy Establishment Trombay, Apollo Pier Road, Bombay 1 798

A Study of Etching Structure on Aluminium by Transmission Electron Microscopy. By R. Phillips and N. C. Welsh, Research Laboratory, Associated Electrical Industries Limited, Aldermaston Court, Aldermaston, Berkshire 801

PAGE

On the Fatigue Limit of Metals. By P. Feltham, Department of Metallurgy, The University, Leeds 806

Observations on Extensive Air Showers. VI. The Ratio of the Soft to Penetrating Components and their Attenuation in the Atmosphere. By T. E. Cranshaw, J. F. de Beer, W. Galbraith, A. M. Hillas, S. Norris and N. A. Porter, Atomic Energy Research Establishment, Harwell 811

Observations on Extensive Air Showers. VII. The Lateral Distribution of Energy in the Electron–Photon Component. By N. A. Porter, T. E. Cranshaw, J. F. de Beer, A. G. Parham and A. C. Sherwood, Atomic Energy Research Establishment, Harwell 826

On Negative Volume Expansion Coefficients. By M. Blackman, Physics Department, Imperial College, London 831

Induced Conductivity at the Surface of Contact between Metals. By S. D. Chatterjee and S. K. Sen, Department of Physics, Jadavpur University, Calcutta 839

Electrical Resistivity of Compounds with Ordered Spin Arrangements. By R. Parker, Department of Physics, University College of North Wales, Bangor 853

The Theory of Small Angle Scattering from Extended Dislocations. By H. H. Atkinson and P. B. Hirsch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 862

An Electro-Polishing Technique for the Preparation of Metal Specimens for Transmission Electron Microscopy. By Heather M. Tomlinson (*née* Murphy), Crystallographic Laboratory, Cavendish Laboratory, Cambridge 867

The Static and Dynamic Strength of a Carbon Steel at Low Temperatures. By C. J. Maiden and J. D. Campbell, Engineering Laboratory, University of Oxford 872

The Containment of Plasma by the Pinch Discharge. By Sir George Thomson, Corpus Christi College, Cambridge 886

Dislocation Loops in Quenched Aluminium. By P. B. Hirsch and J. Silcox, Cavendish Laboratory, Cambridge and R. E. Smallman and K. H. Westmacott, Metallurgy Division, A.E.R.E., Harwell 897

Correspondence:

A Generalization of MacDonald's Inversion Theorem. By F. N. H. Robinson, Clarendon Laboratory, Oxford 909

The Rotation of the First Russian Earth-Satellite. By J. H. Thomson, Cavendish Laboratory, Cambridge 912

Measurements of Thermoelectricity below 1°K.—II. By D. K. C. MacDonald, W. B. Pearson and I. M. Templeton, Division of Pure Physics, National Research Council, Ottawa, Canada 917

Reviews of Books 920

NUMBER 33—SEPTEMBER

Random Walks and Drift in Chemical Diffusion. By A. D. Le Claire, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Berks. 921

The Diffusion Constant, Mobility and Lifetime of Minority Carriers in Germanium containing Parallel Arrays of Dislocations. By J. B. Arthur, A. F. Gibson, J. W. Granville and E. G. S. Paige, Royal Radar Establishment, Malvern 940

PAGE

An Interpretation of certain Transport Properties in Germanium containing Parallel Arrays or Edge Dislocations. By A. F. Gibson and E. G. S. Paige, Royal Radar Establishment, Malvern 950

Cosmic Rays in the Earth's Magnetic Field. By P. Rothwell, Physics Department, Imperial College, London 961

Deformation of Thin Films on Solid Substrates. By D. R. Brame and T. Evans, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 971

Anharmonic Effects in the Theory of Solid Argon. By I. J. Zucker, Wheatstone Physics Laboratory, King's College, Strand, W.C.2..... 987

Some Magnetic Properties of Dilute Ferromagnetic Alloys: II. By B. W. Lothian, A. C. Robinson and W. Sucksmith, Department of Physics, University of Sheffield 999

A Note on Transition Metal Alloys. By C. W. Haworth and W. Hume-Rothery, Department of Metallurgy, University Museum, Parks Road, Oxford..... 1013

A New Method for the Evaluation of Electric Conductivity in Metals. By S. F. Edwards, Department of Mathematical Physics, University of Birmingham..... 1020

The Deformation of Metals by Self-Diffusion. By A. P. Greenough, University College, Swansea, Glam..... 1032

A New Technique for Decoration of Cleavage and Slip Steps on Ionic Crystal Surfaces. By G. A. Bassett, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 1042

The Knight Shift in Superconductors. By V. Heine and A. B. Pippard, Royal Society Mond Laboratory, Cambridge..... 1046

Correspondence :

The Transient Conductivity Increase in Deformed Alkali Halides. By A. Taylor and P. L. Pratt, Department of Physical Metallurgy, University of Birmingham..... 1051

The Nuclear Magnetic Moment of Plutonium-239. By J. Butterworth, Metallurgy Division, A.E.R.E., Harwell, Berks..... 1053

Reviews of Books 1055

NUMBER 34—OCTOBER

An Uncommon Growth Feature in Diamond. By A. Halperin, Royal Holloway College, Englefield Green, Surrey 1057

The Decay of Neodymium-147. By P. Rice Evans, Bedford College, University of London..... 1061

The Use of Magnetic Models in the Interpretation of Domain Effects on an Electron Beam. By M. Blackman and N. D. Lisgarten, Physics Department, Imperial College, London, S.W.7 1069

The Cleavage Surfaces of Type I and Type II Diamonds. By Eileen M. Wilks, The Clarendon Laboratory, Oxford 1074

On the Escape of Impurities from Solids. By Robert Englman, H. H. Wills Physics Laboratory, University of Bristol 1081

The Ductile–Brittle Transition in the Fracture of α-Iron : I. By N. J. Petch, Metallurgy Department, Houldsworth School of Applied Science, University of Leeds 1089

PAGE

The Orientation Dependence of Cyclic Work-Hardening in Aluminium Crystals. By P. Charsley and N. Thompson, H. H. Wills Physics Laboratory, University of Bristol 1098

The Climb of a Dislocation in a Twisted Whisker. By F. R. N. Nabarro and P. J. Jackson, Department of Physics, University of the Witwatersrand, Johannesburg 1105

On the Stability of Dislocations in Metal Whiskers. By J. P. Hirth and F. C. Frank, H. H. Wills Physics Laboratory, University of Bristol 1110

Galvanomagnetic Properties of Cylindrical Fermi Surfaces. By J. M. Ziman, Cavendish Laboratory, University of Cambridge 1117

The Ductile–Brittle Transition in the Fracture of α-Iron: II. By J. Heslop and N. J. Petch, Metallurgy Department, Houldsworth School of Applied Science, University of Leeds..... 1128

The Intensity Profiles of Electron Diffraction Lines. By T. B. Rymer and F. J. Fayers, The University, Reading 1137

The Effect of Atmospheric Corrosion on Metal Fatigue. By N. J. Wadsworth and J. Hutchings, Royal Aircraft Establishment, Farnborough, Hants..... 1154

The Occurrence of Stacking Faults in Metallic Systems. By J. Spreadborough, Department of Metallurgy, The University Museum, Oxford 1167

The Magnetization of Cobalt–Aluminium, Cobalt–Silicon, Iron–Aluminium and Iron–Silicon Alloys. By D. Parsons, W. Sucksmith and J. E. Thompson, Physics Department, University of Sheffield..... 1174

Stripping at Low Energies. By D. H. Wilkinson, Clarendon Laboratory, Oxford 1185

Correspondence:

Interactions of Antiprotons in Nuclear Emulsion. By G. B. Chadwick and P. B. Jones, Clarendon Laboratory, Oxford 1189

NUMBER 35—NOVEMBER

Observations of K^--Meson Interactions in Nuclear Emulsion. By G. B. Chadwick, S. A. Durrani, P. B. Jones, J. W. G. Wignall and D. H. Wilkinson, Cavendish Laboratory, Cambridge, and Clarendon Laboratory, Oxford 1193

Ductile–Brittle Transition in Steels Irradiated with Neutrons. By D. Hull and I. L. Mogford, Atomic Energy Research Establishment, Harwell..... 1213

Isochronal Annealing of Vacancies in Aluminium. By C. Panseri and T. Federighi, Instituto Sperimentale Metalli Leggeri—C.P. 169, Novara, Italy 1223

Growth of Electric Space-Charge and Radio Waves in Moving Ion Streams. By J. H. Piddington, C.S.I.R.O., Radiophysics Laboratory, Sydney, Australia 1241

Charged Particles Emitted from Aluminium on Bombardment with 14 mev Neutrons. By P. V. March and W. T. Morton, Department of Natural Philosophy, University of Glasgow 1256

Etch Pits and Trigons on Diamond: I. By F. C. Frank and K. E. Puttick, H. H. Wills Physics Laboratory, University of Bristol and Eileen M. Wilks, Clarendon Laboratory, Oxford 1262

PAGE

Etch Pits and Trigons on Diamond: II. By F. C. Frank and K. E. Puttick, H. H. Wills Physical Laboratory, University of Bristol 1273

The Scattering of Long Wavelength Neutrons by Irradiated and Unirradiated Quartz. By E. W. J. Mitchell and P. T. Wedepohl, Physics Research Laboratories, University of Reading 1280

Activation Energies for High Temperature Creep of Polycrystalline Zinc. By W. J. M. Tegart, Department of Metallurgy, The University, Sheffield and Oleg D. Sherby, Department of Metallurgical Engineering, Stanford University, California; formerly Department of Metallurgy, The University, Sheffield 1287

On the Delay Time in Plastic Flow of Indium Antimonide. By J. W. Allen, Services Electronics Research Laboratory, Baldock, Herts 1297

An Electron Diffraction Study of Ice Deposits formed on Silver Iodide. By N. D. Lisgarten, Physics Department, Imperial College, London, S.W.7 1306

Grain Boundary Etching on Pure Aluminium. By I. Braun, Institute of Technology, Haifa, Israel and F. C. Frank and G. Meyrick, H. H. Wills Physics Laboratory, Bristol 1312

The Runaway Effect in a Fully Ionized Plasma. By E. R. Harrison, Atomic Energy Research Establishment, Harwell 1318

Correspondence:

On the Temperature Dependence of Yield Stress for Aluminium. By W. D. Sylwestrowicz and D. F. Gibbons, Bell Telephone Laboratories, Inc., Murray Hill, New Jersey 1326

The Evolution of Extragalactic Nebulae and the Origin of Metagalactic Radio Emission. By G. R. Burbidge, Kellogg Radiation Laboratory, California Institute of Technology and Yerkes Observatory, University of Chicago 1327

The Evolution of Extragalactic Nebulae and the Origin of Metagalactic Radio Emission. By C. E. R. Bruce, Electrical Research Association Laboratory 1328

Measurements of Unit Cell and Physical Dimension Changes of Molybdenum after Neutron Irradiation. By J. Adam and D. G. Martin, Metallurgy Division, Atomic Energy Research Establishment, Harwell 1329

The Properties of Beryllium-11. By D. E. Alburger and D. H. Wilkinson, Brookhaven National Laboratory, Upton, New York 1332

Reviews of Books 1334

NUMBER 36—DECEMBER

The Initial Stages of Growth of Oriented Copper Nuclei on Single Crystal Surfaces of Silver. By E. Grunbaum, R. C. Newman and D. W. Pashley, Physics Department, Imperial College, London 1337

On the Thermal Instability of a Rotating Fluid Sphere. By F. E. Bisshopp, Department of Physics and Yerkes Observatory, The University of Chicago 1342

Electrons in Polar Crystals. By G. L. Sewell, Department of Applied Mathematics, The University, Liverpool 1361

Calculation of the Thermal Expansion of Solids from the Third-Order Elastic Constants. By F. W. Sheard, Cavendish Laboratory, Cambridge 1381

PAGE

Thermo-Remanent Magnetization (TRM) of Multidomain Grains in Igneous Rocks. By F. D. Stacey, Department of Geophysics, Australian National University, Canberra, Australia 1391

Adhesion of Evaporated Aluminium Films. By C. Weaver and R. M. Hill, Department of Natural Philosophy, The Royal College of Science and Technology, Glasgow 1402

Grain-Boundary Extrusion and Deformation during the Fatigue of Lead in a Partial Vacuum. By K. U. Snowden, The Broken Hill Associated Smelters Pty. Ltd. and The Baillieu Laboratory, University of Melbourne 1411

The Stresses Produced in a Thin Elastic Plate by a Transverse Impulsive Force. By C. J. Maiden, Engineering Laboratory, University of Oxford 1413

The Interpretation of Soft X-ray Emission Spectra. By J. A. Catterall and J. Trotter, Communication from the National Physical Laboratory 1424

The Dynamic Compression of Perspex. By J. S. Buchanan, H. J. James and G. W. Teague, Ministry of Supply, Armament Research and Development Establishment, Fort Halstead 1432

Dielectric Properties of Some Metaniobate and Metatantalate Ceramics. By R. V. Coates and H. F. Kay, H. H. Wills Physics Laboratory, University of Bristol 1449

Correspondence:

Decay of Lithium-7 Hypernucleus. By P. H. Fowler, H. H. Wills Physical Laboratory, University of Bristol 1460

Heat Transfer between Copper and Liquid Helium II. By N. J. Brow and D. V. Osborne, Department of Natural Philosophy, University of St. Andrews, Fife 1463

Electron Distribution in Transition Metals. By W. Hume-Rothery, Department of Metallurgy, Oxford University, and P. J. Brown, J. B. Forsyth and W. H. Taylor, Crystallographic Laboratory, Cavendish Laboratory, Cambridge University 1466

Nucleation of Cracks by the Intersection of Twins in α-Iron. By D. Hull, Metallurgy Division, Atomic Energy Research Establishment, Harwell 1468

The Absorption of Sound in Dilute Solutions of Helium-3 in Liquid Helium II. By G. O. Harding and J. Wilks, Clarendon Laboratory, Oxford 1469

The Strength of Aluminium Silver Alloys. By Anthony Kelly, Department of Metallurgy, Northwestern University, Evanston, Illinois 1472

Reviews of Books 1475

PLATES

1. Illustrative of I. S. Servi's Paper on Etching Patterns in High-Purity-Zinc.

2 & 3. Illustrative of F. C. Frank *et al.*'s Paper on Deformation Processes in Polyethylene Interpreted in terms of Crystal Plasticity.

4 & 5. Illustrative of R. S. Barnes *et al.*'s Paper on The Observation of Vacancy Souces in Metals.

6. Illustrative of A. D. Whapham's Paper on Propagation of Dislocations in Electron Irradiated Lithium Fluoride.

7. Illustrative of M. J. Makin's Paper on Unloading Effects in the Plastic Properties of Copper Single Crystals.

8. Illustrative of S. Amelinckx's Paper on Dislocations in Caesium Bromide.

9–11. Illustrative of J. T. Bartlett and J. W. Mitchell's Paper on The Decoration of Dislocations in Crystals of Silver Chloride with Gold.

12 & 13. Illustrative of Peter Haasen's Paper on Plastic Deformation of Nickel Single Crystals at Low Temperatures.

14–19. Illustrative of H. H. Atkinson's Paper on Small Angle Scattering from Cold-Worked and Fatigued Metals.

20 & 21. Illustrative of P. Charsley and P. E. Rush's Paper on The Growth of Inorganic Salt Whiskers from Solution.

22–24. Illustrative of R. B. Nicholson and J. Nutting's Paper on The Direct Observation of the Strain Field Produced by Coherent Precipitated Particles in an Age-Hardened Alloy.

25. Illustrative of A. N. Stroh's Paper on The Cleavage of Metal Single Crystals.

26. Illustrative of S. Amelinckx's Paper on The Nucleation of Dislocation Loops during Cleavage.

27. Illustrative of I. J. Polmear and I. F. Bainbridge's Paper on Precipitate Instability During Unidirectional Extension of an Age Hardened Aluminium–Zinc–Magnesium Alloy.

28–32. Illustrative of S. Tolansky *et al.*'s Paper on The Occurrence of Slip in Diamond.

33–39. Illustrative of W. A. Wood's Paper on Formation of Fatigue Cracks.

40–43. Illustrative of R. J. Stokes *et al.*'s Paper on Crack Formation in Magnesium Oxide Single Crystals.

44–46. Illustrative of R. Phillips and N. C. Welsh's Paper on A Study of Etching Structure on Aluminium by Transmission Electron Microscopy.

47–49. Illustrative of Heather M. Tomlinson's Paper on An Electro-Polishing Technique for the Preparation of Metal Specimens for Transmission Electron Microscopy.

50–52. Illustrative of C. J. Maiden and J. D. Campbell's Paper on The Static and Dynamic Strength of a Carbon Steel at Low Temperatures.

53–59. Illustrative of P. B. Hirsch *et al.*'s Paper on Dislocation Loops in Quenched Aluminium.

60–62. Illustrative of D. R. Brame and T. Evan's Paper on Deformation of Thin Films on Solid Substrates.

63–65. Illustrative of G. A. Bassett's Paper on A New Technique for Decoration of Cleavage and Slip Steps on Ionic Crystal Surfaces.

66. Illustrative of A. Taylor and P. L. Pratt's Paper on The Transient Conductivity Increase in Deformed Alkali Halides.

67 & 68. Illustrative of A. Halperin's Paper on An Uncommon Growth Feature in Diamond.

69–72. Illustrative of M. Blackman and N. D. Lisgarten's Paper on The Use of Magnetic Models in the Interpretation of Domain Effects on an Electron Beam.

73–78. Illustrative of Eileen M. Wilks's Paper on The Cleavage Surfaces of Type I and Type II Diamonds.

79. Illustrative of P. Charsley and N. Thompson's Paper on The Orientation Dependence of Cyclic Work-Hardening in Aluminium Crystals.

80 & 81. Illustrative of N. J. Wadsworth and J. Hutchings's Paper on The Effect of Atmospheric Corrosion on Metal Fatigue.

82 & 83. Illustrative of F. C. Frank *et al.*'s Paper on Etch Pits and Trigons on Diamond: I.

84–87. Illustrative of F. C. Frank and K. E. Putticks's Paper on Etch Pits and Trigons on Diamond: II.

88. Illustrative of J. W. Allen's Paper on The Delay Time in Plastic Flow of Indium Antimonide.

89 & 90. Illustrative of N. D. Lisgarten's Paper on An Electron Diffraction Study of Ice Deposits formed on Silver Iodide.

91–96. Illustrative of I. Braun *et al.*'s Paper on Grain Boundary Etching on Pure Aluminium.

97. Illustrative of E. R. Harrison's Paper on The Runaway Effect in a Fully Ionized Plasma.

98. Illustrative of C. Weaver and R. M. Hill's Paper on Adhesion of Evaporated Aluminium Films.

99 & 100. Illustrative of K. U. Snowden's Paper on Grain-Boundary Extrusion and Deformation during the Fatigue of Lead in a Partial Vacuum.

101. Illustrative of C. J. Maiden's Paper on The Stresses Produced in a Thin Elastic Plate by a Transverse Impulsive Force.

102. Illustrative of J. S. Buchanan *et al.*'s Paper on The Dynamic Compression of Perspex.

103. Illustrative of P. H. Fowler's Paper on Decay of Lithium-7 Hypernucleus.

104. Illustrative of D. Hull's Paper on Nucleation of Cracks by the Intersection of Twins in α-Iron.
